## **PROFIT FROM EDUCATION** *Professional Continuing Educational Seminars*

CPS has partnered with 5-2-1 to provide our valued customers with professionally produced continuing education seminars specifically designed for the air conditioning and refrigeration service technician. Each information-packed seminar was developed by respected industry professionals with a combined 50 years of field related experience, including the successful operation of an accredited A/C&R teaching facility for over 25 years. All events are highlighted by professionally produced multimedia presentations, in-depth technical question/answer sessions, and invaluable "hands-on" training that will provide the attendee with practical, profit producing skills they can apply on their very next service call.

The best part of this value added educational program is that it is offered absolutely FREE to select authorized CPS and 5-2-1 partners.

### **Here Are the Topics Currently Offered:**

- Understanding Superheat & SubCooling
  - Compressor Longevity & Energy Efficiency
  - Principles of Evacuation & Recovery
